# SPEED-GRIP 5

## THE WINTER'S TOUGHEST CHALLENGER.

With our new SPEED-GRIP 5, winter cannot surprise you. This new tyre with its attractive pattern and striking off-shoulder design is a true multi-talent combining strong winter features with a reliable dry performance.

### TRUST IN EXCEPTIONAL WINTER ABILITIES

Drive with confidence, no matter the conditions. Snow hooks and grip edges allow superior handling in deep snow. The sipe concept positioned in various angles results in an efficient interaction with snow surfaces during acceleration and braking.

### GOOD BALANCE ON WET SURFACES

The tread pattern design helps disperse water on the road during braking and cornering. The V-shape pattern leads to an effective water and snow slush drainage for balanced stability in wet driving conditions.

### HIGH PRECISION WHEN CORNERING

Added stiffness and well-balanced structure of the shoulder blocks lead to precise handling. So, you are in control when it comes to cornering in any situation the cold season has to offer.

### DIMENSIONS

**Tyre width in mm**  
165 - 245

**Tyre cross section**  
Series 70 - 40

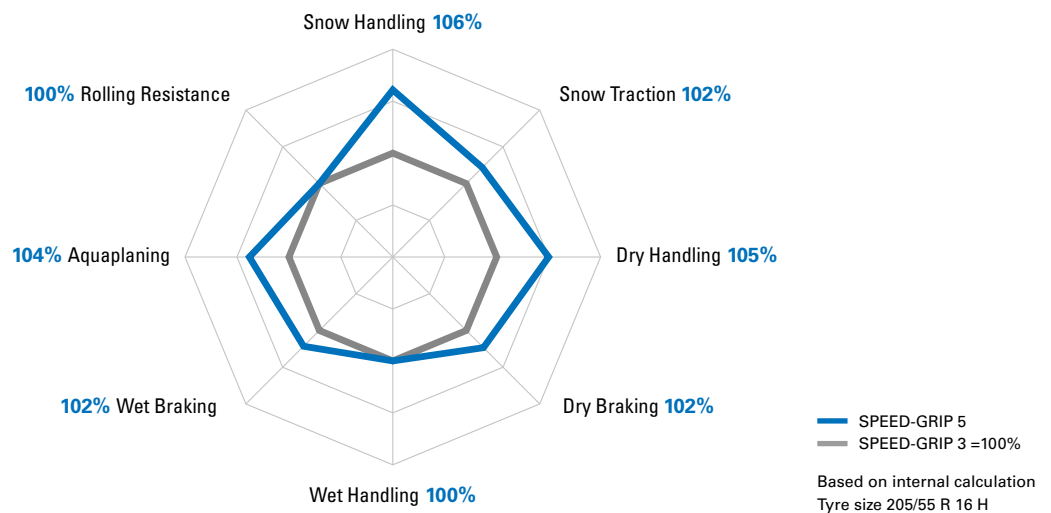

**Rim size in inches**  
14 - 20

**Speed symbol**  
T/H/V/W
